

Aluminium door with GENIUS and KNX gateway

AS 2600 GENIUS

- Fast and quiet electronic locking and unlocking of all locking elements, including the deadbolt in the main lock
- Permanent locking monitoring and readiness for operation
- Future-proof SI-BUS technology with 128-bit AES encryption
- Optimum sealing thanks to a powerful gear motor: lower energy costs, protection against warping
- Can be easily combined with the SIEGENIA access control systems: fingerprint scanner, keypad, transponder and sensor door handle
- Future-proof due to remote system updates and extensions

Production benefits

- Identical milling dimensions as in standard KFV multi-point locks
- Narrow installation width of just 16 mm and installation depth of as little as 52.5 mm
- Ultra-easy ordering, installation and commissioning due to optional plug & play solutions
- Menu navigation and status messaging in installed state by colour LEDs and/or SIEGENIA Comfort app

EPD*:

[Environmental Product Declaration](#)
[Electromechanical locks](#)

* Environmental Product Declaration (EPD): a document that provides transparent information about the environmental impact of a product during its service life.
